DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 31, 2007 has been entered.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the cited prior art because the prior art does not teach, disclose nor make obvious the claimed method for reducing the frequency and/or intensity of chronic obstructive pulmonary disease (COPD) exacerbations experienced by a patient suffering from COPD, which method comprises administering to the patient via inhalation (i) a first active ingredient which is formoterol, a pharmaceutically acceptable salt or solvate thereof, or a solvate of such a salt; and (ii) a second active ingredient which is budesonide, wherein the method is effective to reduce the frequency

and/or intensity of exacerbations in the patient, the first and second active ingredients are administered simultaneously, and the molar ratio of (a) formoterol in the first active ingredient to (b) the second active ingredient is from 1:555 to 2:1.

Applicants presented declaration showing the synergistic effect of the claimed combination therapy in the treatment of COPD. (the 2005 Trofast Declaration) and it is persuasive.

The cited prior art of record, Renkema et al. teach the effects of long-term treatment of COPD with corticosteroids (i.e. budesonide). However, the dosage employed by Renkema et al. is high dose of 1600ug budesonide and suggests that still higher doses of corticosteroids are needed in patients with COPD. Further, the reference warrants further studies to clarify the effect in larger numbers of the patients with COPD. Therefore, there is no motivation to employ the combination with specific amounts ratio for the treatment of COPD because there is no reasonable expectation of successfully treating COPD without specific teaching and suggestion from the prior art.

The prior art of record, Vestbo et al. (Update on the "Dutch hypothesis" for chronic respiratory disease", 1998) disclose that for the clinician, the clinical picture of COPD and asthma is distinguishable and it makes sense to separate asthma from COPD in terms of treatment strategies, treatment goals, etc. (page 517, right-hand column, last paragraph). Therefore, there is no motivation for one of ordinary skill in the art to employ Carling et al's combination for the treatment of COPD because the

treatment goal of COPD as well as the actual treatment of COPD is separate from asthma for the clinicians in view of Vestbo et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
